

# Zimbra LDAP

## Connect to Zimbra LDAP Server

```
zimbra @ mail: ~ $ zmlocalconfig -s zimbra_ldap_password ldap_master_url
```

the result will be something like

```
zimbra_ldap_password = thepassword  
ldap_master_url = ldap: // server: 389
```

## Connect to the LDAP Server with

```
LDAP Server address: ldap: // server  
LDAP Server port: 389  
Binddn LDAP: uid=zimbra,cn=admins,cn=zimbra  
LDAP password: thepassword  
LDAP base: dc=yourdomain_zimbra,dc=com
```

## Example LDAP Filter for Zimbra

```
(& (uid =% s)) for authentication user without @domain  
(& (mail =% s)) for the authentication with user@domain.com
```
